NEX-U®

WIRELESS FLUID MANAGEMENT SYSTEM

WIRELESS FLUID MANAGEMENT SYSTEM

New NEX·U·® U·Link with full wireless technology for vehicle and fleet service

BENEFITS OF USING A FLUID MANAGEMENT SYSTEM

What is NEX·U·® U·Link?

NEX·U·® with U·Link is a wireless fluid management system that provides the control and the information you require to make your operations more profitable. You will be able to account for every drop of lubricant or other service fluid used. On top of this, you will keep efficient inventory control, which includes automatic alerts and fluid reordering when needed, to eliminate operation downtime. The high cost of lubricants and other service fluids, the NEX·U·® investment is quickly paid back, regardless of shop size or fluid consumption.

Main components

U·link Dispensing Valve

- Communicate with U·track software
- Accurate dispensing
- Easy to operate
- Battery powered (four AA)

U·track Software

- Create work orders
- Integrate with DMS
- Track your transactions
- Monitor Fluid Inventory
- Warning Alerts
- Produce data reports

U·tank Module

- Monitor tank levels
- Avoid tanks running empty
- Avoid spillover
- Level alerts

MONITOR:

- Real time information about fluid transactions and inventory.
- Inventory management (refills schedule, alerts...)
- Automatic alerts.

TRACK:

- Reconcile fluid purchases and inventory with fluid sales and use.
- DMS integration.

• Increased reliability and full track of fluid transactions.

• Improved productivity.

• Accurate billing.

3 DIFFERENT DISPENSING MODES

Standard

- Identify technician.
- Input in to work order.
- Enter dispensing quantity.

Pre-Set

- Identify technician.
- Select work order, previously input in to U·track software.
- Confirm volume.

Integrated & Remote

- Start transaction using 3rd party software or U·track.
- Confirm volume.

Why NEX·U·® U·Link?

WIRELESS

- The system can work fully Wireless reducing installation costs.

INCREASED PRODUCTIVITY

- Keep control of service fluids.
- Control every transaction from the dispensing valve.

OPTIONAL API

- Optional API is available for integrations with 3rd party DMS.

SIMPLE

- Intuitive software.
- Plug & Play.

VERSATILE

- The system can be installed fully Wireless, or hybrid mode (combining wireless and wired).

UPGRADING

- An existing NEX·U·-system can easily be upgraded to use U·Link.
